

Changes:

- Elle's snap ability isn't opening a portal and isn't reactivatable, it doesn't work at all.
- Slimeball can now cancel his V ability by pressing jump, performing a wall jump off the wall
- Roxie's rocket should be an actual 3d projectile, not hitscan, it also needs to be more easily visible, so make the model bigger
- Increase time Rocco's Ripple lasts in the field for to 5.5 seconds
- ENSURE the ball does not turnover until it actually visibly touches the ground or the top of an obstacle
- Give Mace's V a 3 second hidden cooldown (from the time she lets go of V/it runs out)
- Add a toggle to test dash cooldown refreshing on every kill

Practice/testing range:

- Include a practice range, with stationary enemy bots that take damage. Make sure they respawn in place a short time after dying. This doesn't need to be a full map, just a space to test abilities, movement, and gunplay.
- Include an option to pick up and drop the core, within the testing range. This means that there is a spot where you can leave the core without it turning over. Again, this is ONLY within the testing range.
- Include a toggle within the range for infinite abilities (no cooldowns) and allow players to switch characters without leaving the range.
