

- Everytime I try to open settings (within the game), the unreal project crashes
- The new cursor ui is working, but my cursor shows on top of it
- The button's hover state doesn't fully work
 - The orange outline shows up while hovering, but not the green text from my assets
- Increase gun RPM from 150 to 190
- Infinite abilities toggle in the practice range doesn't do anything
- Add a mantle for Mortimer, as the original instructions requested. It doesn't have to be the old mantle—make a new one which acts the same, but for just him.
- Decrease the scaling for Mortimer's bonus throw: after the original 100% charge window has passed, add a .6x modifier to the linear scaling of his throw charge. This way, Mortimer can still charge his throws extra, but they don't go quite as far.
- The “bonus window” for getting a boost while sliding needs to happen .4seconds earlier in the slide, shorten the duration of the slide by .4seconds as well.
- For character's who have abilities that modify base abilities (e.g. change cooldowns, distance, etc.) those abilities should adjust when the base ability does.
 - For example, this patch requests a fire rate change to the gun. Roxie's modded ability should scale with this change, because it modifies the base fire rate.
 - If changes are made this way, state them in the commits
- Increase X's base vulnerable to 35% extra damage, keeping the 5% extra per stack after one intact, and all other aspects intact
- Chut's “Chud” ability doesn't reset when he gets a knife kill. Rather than the cooldown resetting, I want the ability to go back to the max timer on every kill. E.g. if chut has 5seconds left on his ability and he gets a kill, the timer goes back up.
- Change Rocco's passive to last for 3s rather than 1s, keep everything else intact
