

- Lily's E isn't working right. Pressing space once makes her continuously move up even after I let go, and pressing control doesn't make her come down. Half the speed she moves vertically at.
- Change Mortimer's dash to be 40% of a normal one instead of 25%, but increase Mortimer's dash cooldown by 25%
- Mortimer's quake isn't working, Mortimer's mantle isn't working
- Elle's portal is invisible. Make a circle placeholder portal, glowing purple
- Change Lily so she only has an extra dash when she is not carrying the core
- The new UI is not loading in the game, maybe this is because the windows build isn't working. Make sure it can load for windows as well

Error text for windows build script:

```
[1/16] Compile [x64] Module.Trace.1.cpp
C:\Users\ranen\trace\Source\Trace\Abilities\Characters\TraceAbilitySetLily.cpp(295,13): error C2039: 'SetJumpHeld': is not a member of 'UTraceCharacterMovementComponent'
