

- Add ammo to the guns. 30 bullets per clip, then the gun reloads. R to reload.
 - X's Sting ability reloads the clip with just the 5 bee bullets; after shooting those, his next reload is normal.
 - Reloading takes .5seconds
 - Show ammo in the hud on the bottom right
- Reduce the velocity gained from ripple by 30%
 - This applies to both Rocco and other players using his ripple
- Increase the distance which Chut's bash knocks players by 25%
- Run a check on all movement mechanics to ensure they work as expected
- Add a small, semi transparent cloud when oyster's poison jars break.
 - This cloud should be the radius of the explosion
- For the throw charge, use the old circle around the crosshair animation for game mode a to demonstrate how charged /100% the throw is, rather than a bar on the hud
 - Make 100% charge be at .8seconds vs 1second, keeping the linear scale
- Set Wall jump outward impulse to 360 uu/s
- Increase Well timed Slide jump bonus by 10%
- Dash speed to 3300 uu/s
- Statuses should show on the hud in the bottom right, separate from cooldowns (eg speed boost, poisoned, vulnerable, etc)
- Change X's vulnerable to stack with each hit
 - The first stack still causes 25% extra damage, but each additional stack only adds 5%
 - Whenever the timer runs out, all stacks disappear
